Friday \$35 Adult \*Children Free

Saturday \$45 \*Children Free

\* Children must be under 14 and accompanied by paying adult.

**Formula 1 NEWS UPDATE**

Mark had an eventful British Grand Prix, coming home just 0.4s shy of Sebastian Vettel in third place.

He made two pitstops en route to the 25th podium of his career.

"It was a mixed race," says Mark, "and I've come away with slightly mixed emotions. To win on Sunday afternoons, you have to get everything right and we didn't do that. You make your own luck in motor racing and Fernando [Alonso] was the deserved winner of the race."

**BRAKE**

2nd issue Aug 2011

**YOU DON'T NEED A JACKET!!  
THIS WINTER LET  
ERAPS INTRODUCE YOU WITH THE  
NEW TECHNOLOGY FROM JAPAN  
TO KEEP YOU WARM IN WINTER**

**Buy 10 sets of ACRE brake pads  
or 20 sets of Horsepower Brake pads  
on 1 invoice between  
11 Jul - 31 Aug 2011**

**to receive the latest technology from  
Japan - Hand warmer in a pack of 10.**

Features: Quickly generate heat in a few minutes.  
Temperature can be maintained at 40°C or above for  
up to 20 hours. Generate constant heat.  
Keep body warm in winter especially good for outdoor  
work or activities like fishing, camping, playing golf,  
skiing, etc. Don't let the cold weather stop you from  
going anywhere.

size: 132mmx100mm Place of origin: Japan  
Highest temp @ 66°C, avg @ 52°C

Direction: Take out 1 packet from plastic bag, shake it well  
and put it in your pocket. Wait a few minutes for it  
to generate heat itself and place at position where warmth  
is desired. Eg, hand, pocket.

Available while stock last.

**GET THE HOTTEST PADS IN TOWN TO STAY HOT IN WINTER.**

## Brake Surgeon

In every new issue of News Brake Newsletters Eraps resident Surgeon will help answer any questions you have and help solve a wide variety of Brake related problems.

Q: "I have a Citroën Xantia 1.9 TD and I have tried almost all the different makes of brake pads on the market, but all of them squeak. What is the problem?"

A: The problem of squealing brake pads may be caused by the pads fitting badly with the disc. This makes the pads vibrate and produce a squeaking sound. But even when the discs and pads are new, if the assembly is not correctly carried out, it can cause squeaky brakes. The solution to the problem of squeaking brakes is to make sure that the assembly has been carried out correctly and to check that the pads wear in well over the first 300kms or so. You should not brake sharply but try to brake progressively and softly. The noise problem is often associated with the design of the vehicle. There may be materials used in other systems within the car whose vibration frequency coincides with the frequency at which the brake pads vibrate on the calliper when the brake is applied and the noise is produced for this reason. Horsepower pads come standard with anti squeal shims, this will reduce the noise of the pads.
